

# Pressurization / Filtration

Custom Air Products & Services, Inc. is one of the leading manufacturers of custom built **Pressurization and Filtration** systems.

**Pressurization applications**, pressurizations units are typically used in Chemical Plants, Refineries and Manufacturing Facilities; Control Rooms, Labs, Computer Rooms, Breakrooms and MCC's Purpose; Maintain a positive pressure in the area to keep dust, chemicals fume, hazardous and explosive gasses out of buildings.

**Filtration applications**, scrub / clean and filter out chemicals, fumes and dust. Both systems used in conjunction can create temporary "Safe Havens" in the event of harmful fume releases.

## Pressurization Systems

- Single Fan Systems
- Dual Fan Systems
- Blackstart Controls
- Computer Controlled
- Programmable Smart Relays
- VFD Controlled
- Custom Designed Per Customer Specifications

## Filtration Systems

- Industrial Air Scrubbers
- Industrial Grade HEPA Filters
- Hazardous Particulate Collectors
- Airborne Dust & Dirt
- Return Air System Filtration
- Recirculation Air UV Cleaners
- Enclosed Contaminant Filters
- High Temperature Air Filters
- High Velocity Turbine Filters

All Systems Designed & Built in Compliance with Applicable standards:  
**ABS - ADA - ASHRAE - DNV - NEC - NFPA - SMACNA**

**"We Design, Build, Install & Service HVAC Systems"**
